

Barrel;

Our barrels are made of Asil Çelik brand, 1.class **A Quality** 4140 solid bar, molly steel. Barrels are processed by drilling a straight hole through a bar of steel. Balance, smoothness and inner diameter calibration in barrel are extremely important. This, our shotguns offer the best performance on target shot and shotgun pattern distribution. Barrels are tested with high pressure test cartridge which is special production. Barrel is one of the primary subjects that our company puts excessive emphasis on it...
