

Stock and Forend;

We produce completely hand crafted 2 and 2.5 number of quality walnut wood stock and forends. Stock length measures, pitch angle and deviation angles are processed according to the **"European standards"**. These precise measurements and angles in stock are extremely important for shotgun's balance. All these technical details play a fundamental role on the quality and the performance of the shotgun. As **"FIAS-CESA"** we built our production over all these details and we have been trying to offer the best quality products to you, our esteemed customers...
